PROFESSIONAL SUMMARY

Enthusiastic IT postgraduate student at the University of Waikato, pursuing a Master of Information Technology (expected November 2025), with a British IT degree and excellence in **problem-solving, teamwork, and timely project delivery**. Blending academic achievements with leadership experience as a Sri Lankan First XI (Senior) School Cricketer, I am eager to apply my skills in **developing responsive web using cutting-edge tools like ReactJS, NextJS, TypeScript, NestJS, NodeJS, and Cloud technologies within Agile environments**. Passionate about contributing to New Zealand's tech sector with a strong commitment to academic excellence, community engagement, and integrating sustainable practices into technology while learning from industry experts.

KEY STRENGTHS

- Skilled in **full-stack development** with ReactJS, NextJS, NodeJS, and NestJS.
- Collaborates effectively in **Agile teams**, using tools like GitHub, Trello, and Miro.
- Adept at **problem-solving** and addressing client needs.
- Excels in **time management**, balancing academic, professional, and volunteer commitments.
- Adaptable and eager to master emerging technologies, including **AI integration**, to enhance development solutions.
- Experience in **cloud technologies**, with a commitment to expanding expertise in this area.

RELEVANT EXPERIENCE

Versatile experience in web development, teamwork, and problem-solving.

Software Developer | full-time| Digital Yogin SRL, Italy (Remote) 2021 Nov – 2023 Nov

- Developed front-end and back-end solutions for multiple projects using ReactJS, React Native, and NodeJS.
- Collaborated with designers and mobile developers to gather requirements and deliver user-focused applications for diverse clients.
- Led code reviews, debugged complex API issues, and mentored junior developers.
- Implemented caching and modular designs to reduce bugs and achieve faster sprint iterations.

Software Developer Intern | full-time | Mediio Ltd, South Korea (Remote) 2021 May – 2023 Oct

- Supported development of an online consultation platform using ReactJS and MUI, meeting strict deadlines.
- Delivered modern, responsive websites tailored to client specifications.

PROJECT PORTFOLIO

Successfully managed IT projects with professionalism and efficiency, ensuring timely delivery and high-quality outcomes.

"Portfolio" Web Application | Personal Project

Goal : Showcase personal projects and skills with a modern, responsive interface.

Platform : NextJS, ReactJS, TypeScript, LeafletJS, ThreeJS.

Achievements : Deployed on Vercel, featuring interactive maps and 3D visualizations, demonstrating foundational deployment skills and a commitment to learning.

"Pet Social Media" Web Application | University of Waikato, Master's Project

Goal : Build a platform for pet owners to connect, share content, and chat in real-time.

Platform : ReactJS, TypeScript, NodeJS, MongoDB Atlas, Socket.io.

Achievements : Delivered a secure, user-friendly application with authentication and real-time features in 12 weeks, collaborating with peers using Agile task management tools to meet deadlines.

"eVoting System" | University of Waikato, Master's Group Project

Goal : Create a secure, scalable online voting system for NZ elections.
Platform : NextJS, TypeScript, AWS (EC2, Cognito, DynamoDB, Lambda, SQS).
Achievements : Led Web Application module, delivering a high-performance system in 10 weeks. using Agile task management tools (GitHub, Microsoft Loop) to overcome coordination challenges.

Cricket Player Ranking System | University of Westminster, Bachelor's Final Year Project

Goal : Enable unbiased selection of Sri Lankan cricketers for national teams.
Platform : Python, Scikit-Learn, ReactJS, Flask APIs.
Achievements : Delivered a K-means clustering system in 8 months, addressing data quality issues through preprocessing to ensure accurate rankings under resource constraints.

Breast Cancer Prediction System | University of Westminster, Bachelor's Group Project

Goal : Develop a mobile app for early breast cancer risk prediction using lifestyle data.
Platform : React Native, Python, cloud-hosted database, TensorFlow.
Achievements : Develop a mobile app with lifestyle-based risk predictions in 8 months, using Agile planning and pre-tested ML libraries to meet deadlines, ensuring data privacy and overcoming compliance challenges.

OTHER EXPERIENCE

Retail Service Assistant | Mitre 10 MEGA Te Rapa & Ruakura Store, New Zealand 2024 Oct – Present
